

Cyber solutions for industry and infrastructure

CYBELIUS' solutions cover the entire cybersecurity process. They are based on products, engineering and services developed and adapted for industrial systems.

REAL TIME MONITORING

- ☐ Non-disruptive traffic acquisition
- ☐ Protocol monitoring
- ☐ Data analysis
- ☐ Enrichment by the operating context
- ☐ Anomaly and intrusion detection
- ☐ SOC/SIEM alert generation and transmission
- ☐ Dynamic system mapping
- ☐ Specific operational and cybersecurity views
- ☐ Pre and post anomaly recordings

SECURED

- ☐ OT - IT separation
- ☐ Partitioning and perimeter filtering
- ☐ Remote access security
- ☐ Communications encryption
- ☐ Authentication and access rights
- ☐ Equipment strengthening
- ☐ Security events logging
- ☐ Secured updates deployment
- ☐ Backup and restore

EVALUATION

- ☐ Risk analysis
- ☐ System inventory
- ☐ Multi-level mapping
- ☐ Communications inspection
- ☐ Vulnerabilities identification
- ☐ Establishment of the protection profile

Cybelius WAS FOUNDED

par by SCADA and control-command experts, in collaboration with cybersecurity specialists. Together they develop products and solutions that:

- Take into account the realities of businesses and cultures,
- Meet to prescriptive standards,
- Are aligned with the state of the art and recognised technologies.

OUR PRODUCTS VECTORS OF OUR SOLUTIONS

- THE INITIAL EVALUATION USES OUR **CYMAP** SOFTWARE, AS WELL AS OUR **APERIO** RISK ANALYSIS METHODOLOGY.
- SECURITY IS ENSURED BY THE MULTI-FUNCTIONAL PRODUCT **CYFENCE**.
- REAL-TIME MONITORING IS PERFORMED BY **CYFENCE** FOR SYSTEM ACTIVITY, AND BY **CYPRES** PRODUCT FOR ENHANCED PROTECTION AND INTRUSION DETECTION.

R&D AND INNOVATION

They allow CYBELIUS to

- develop, maintain and develop own products.
- file patents.
- select proprietary or open technologies adapted to OT world.
- participate in collaborative projects with clients or technological start-ups, particularly in AI (artificial intelligence).

CyPRES was developed with H2020 funding from the European Commission.

CYBELIUS is a member of the European CyberSecurity Organisation (ECSO).

PARTENERSHIPS

- Cybelius is a partner with GFI for the optimised integration of Keenai SIEM with its products.

- Cybelius is a distributor and user of the architecture security audit and mapping software of NETWORK PERCEPTION.

- Cybelius is a partner of SEMERU, a company of FAYAT ENERGIE SERVICES, to deliver an integrated Industrial IT and Cybersecurity offer to customers.
